Московский государственный технический университет им. Н. Э. Баумана

Отчёт по домашнему заданию	
по курсу «Разработка интернет-приложений	>>

Выполнил: студент группы ИУ5-51Б Головацкий А. Д. Проверил:

преподаватель каф. ИУ5 Гапанюк Ю. Е.

Подпись и дата: 15.12.2021 Подпись и дата:

Описание задания.

- 1. Разработать сервер на node js, используя express. В качестве базы данных использовать MongoDB. Веб-сервис развернуть на облачном сервисе heroku.
- 2. Разработать SPA, используя React + TypeScript. В качестве stateменеджера использовать Redux.
- 3. Реализовать тестирование, используя: скриншотные тесты, unit-тесты, интеграционные тесты (поднимать selenium и прогонять на поднятом браузере приложение).
- 4. Добавить авторизацию, используя FireBase.

Текст программы.

Сервер:

server/server.js:

server/app/controllers/movies.js:

server/app/models/movie.js:

```
const mongoose = require('mongoose');

const MovieSchema = new mongoose.Schema({
    id: Number,
    adult: Boolean,
    backdrop_path: String,
    genre_ids: Array,
    original_language: String,
    original_title: String,
    overview: String,
    popularity: Number,
    poster_path: String,
    title: String,
    video: Boolean,
    vote_average: Number,
    vote_count: Number,
})

const Movie = mongoose.model('Movie', MovieSchema);
```

server/config/app.js:

```
module.exports = {
    port: process.env.port || 3001,
    mongoUri: 'mongodb://localhost:27017/movie-db'
}
```

server/config/express.js:

```
const bodyParser = require('body-parser');

module.exports = (app) => {
    app.use(bodyParser.json());
    app.use(function (req, res, next) {
        res.setHeader('Access-Control-Allow-Origin', 'http://localhost:3000');
        res.setHeader('Access-Control-Allow-Methods', 'GET, POST, OPTIONS, PUT,
PATCH, DELETE');
    res.setHeader('Access-Control-Allow-Headers', 'X-Requested-With,content-type');
    res.setHeader('Access-Control-Allow-Credentials', true);
```

```
next();
});
}
```

server/config/express.js:

```
const app = require('./app');
const express = require('./express');
const routes = require('./routes');

module.exports = {
    app,
    express,
    routes
}
```

server/config/routes.js:

```
const movies = require('../app/controlers/movies');

module.exports = (app) => {
    app.get('/', (req, res) => res.send('q world'));
    app.get('/movies/:search', movies.getAll);
    app.post('/movies/', movies.create);
    app.put('/movies/:id', movies.update);
    app.delete('/movies/:title', movies.remove);
}
```

server/Procfile (для деплоя на heroku):

```
web: node server.js
```
